Excerpt from International Survey of the Neural Network Research Community: Preliminary Report In order to identify the first two phases of the community s evolution, a graph is made of the cumulative number of respondents over time as indicated by their year of entry (see figure The graph shows both the cumulative number of respondents in the field (on the left axis) and cumulative percent (on the right axis). It clearly illustrates the rapid growth in the field, which began about 1984. About 25 of the respondents entered the field prior to 1984, whereas about 75 entered from 1984 to 1990. In accordance with the phase model presented in the introduction, in the subsequent analysis the period from 1950 - 1983 will be designated as Phase I, or the bootlegging phase; and the period from 1984-1990 will be designated as Phase II, or the bandwagon phase.
