paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Paperback. Pub Date: 2005 08 Pages: 252 Language: Chinese in Publisher: Harbin University of Technology Press. the automatic control class textbook of colleges and universities in the 21st century: modern control theory (3rd edition) single input - single-output linear time-invariant system as the basic background of the modern control theory. Including the basic concepts of classical control theory. the equation of state and output equations. the motion of the system and the discretization. system controllability and observability. state feedback and state observer variational method with quadratic optimal control. Liya Pu Ivanov stability theory and adaptive control. modern frequency domain method. With before and after the engineering graduate admission control theory test questions and answer with thinking. training syllabus for teachers and students to refer to the book. Automatic control class textbook of colleges and universities in the 21st century: modern control theory (3rd edition) as institutions of higher learning non-automatic control professional graduate (including Engineering master soil Graduate in) and automatic control professional undergraduate college students textbook scientific and technical personnel (including senior technician). also can be used as training and self-study materials. Contents: control the process of development of the theory of the basic concepts of the first chapter of classical control theory 1.1 Introduction 1.2 1.3 1.4 transfer function of the system absolute stability and relative stability of the discretization of 1.5 poles with system performance 1.6 continuous system 1.7 modern control theory and classical control general time-domain description of the theory of comparative summary of the second chapter of the state equation and output equation 2.1 Introduction 2.2 The state space description concept 2.3 system into state space description the 2.4 frequency domain description into the state...
