Excerpt from **Elementary Botany: Theoretical and Practical, a Text-Book Designed Primarily for Students of Science Classes Connected With the Science and Art Department of the Committee of Council on Education** The object of this text-book is as far as possible to give a general idea of the fundamental facts and principles of the science. In many elementary works the greater part of the book is taken up with mere structural details, the Physiology of the Plants being relegated to a short chapter at the end. I have endeavoured, whilst tracing up the growth and development of the plant from the seed, to treat of the functions of each organ at the same time as its description. Through the liberality of the publishers, the book is well supplied with diagrams. It will not do, however, for the student to trust to these alone. No science can be properly studied from mere book-work, and this is especially true of such a science as Botany, which deals with various forms of natural objects. The student is strongly urged from the first to carefully examine specimens. A sharp penknife and a simple lens, which will only cost a few shillings, are all the apparatus required for dissecting and examining most flowers, and the commonest plants around us will well serve the student s purpose. For some parts of the subject - as, for instance, the examination of Cellular Tissues - a microscope is needful. An excellent instrument can be obtained at any of the well-known makers for about five or six pounds. The student should also especially accustom himself to writing out descriptions of plants according to the model given at the close of the...
