SPONTANEOUS POTENTIAL INVESTIGATIONS IN SEMENIC MOUNTAINS

Spontaneous Potential
investigations in Semenic
Mountains

LAMBERT

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | The use of geophysical methods such as that of Spontaneous Potential (SP) to investigate areas where the geomorphological processes occur, has the role to identify less visible processes as for example subcutaneous erosion or piping, subsoil water drainage and finding specific spatial differences of these processes. Comparative study of these sites allows correlation between geomorphological factors, soil and climate, but also to observe the evolution of subsurface erosion or underground water infiltration...

Reviews

Good electronic book and valuable one. It is one of the most incredible publication we have read through. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Mrs. Bridgette Rau MD**

Complete information for ebook fans. It is actually full of knowledge and wisdom I am pleased to inform you that this is basically the very best pdf we have read through inside my very own daily life and can be he very best ebook for ever.
