Excerpt from Reports of Proceeding of the Ninth Annual Meeting: Held at the Society of Arts Rooms, John Street, Adelphi, London A report on the sulphur purification at the Beckton gas-works dated January 31, 1872, has been issued, the publication of which was looked forward to with much interest, especially as the Gas Committee of the Corporation of the Cit of London has loudly complained of the large increase in the amount of snip ar in the gas supplied to the City since its manufacture commenced at the Beckton works. It appears from the report that the complaints made by the Gas Committee were well founded, inasmuch as the sulphur compounds in the gas supplied by the Chartered Company previously to the opening of their new works at Beckton contained, on the average, 27 1 grains in 100 cubic feet, whereas the gas from Beckton in the middle of last year contained, on the average, 432 grains, and even this large amount has been increased since that time.
