

Organizations and Strategies in Astronomy 7 (Paperback)

Filesize: 7.04 MB

Reviews

Completely among the best pdf I actually have possibly read through. It is probably the most awesome pdf we have read. You wont really feel monotony at whenever you want of your time (that's what catalogs are for about in the event you ask me).
(Prof. Martine Lesch)

ORGANIZATIONS AND STRATEGIES IN ASTRONOMY 7 (PAPERBACK)

Springer, Netherlands, 2014. Paperback. Condition: New. 2006 ed.. Language: English . Brand New Book ***** Print on Demand *****.Astronomy is the most ancient science humans have practiced on Earth. It is a science of extremes and of large numbers: extremes of time - from the big bang to infinity -, of distances, of temperatures, of density and masses, of magnetic fields, etc. It is a science which is highly visible, not only because stars and planets are accessible in the sky to the multitude, but also - cause the telescopes themselves are easily distinguishable, usually on top of scenic mountains, and also because their cost usually represent a substantial proportion of the national budget and of the taxpayers contribution to that budget. As such, astronomy cannot pass unnoticed. It touches on the origins of matter, of the Universe where we live, on life and on our destiny. It touches on philosophy as well as on religion. Astronomy is the direct contact of humankind with its origins and the immensity of universal nature. It is indeed a science of observation where experimentation is practically - possible and which is ruled by mathematics, physics, chemistry, statistical analysis and modelling, while offering the largest number of verifications of the most advanced theories of fundamental physics such as general relativity and gravitation. At the beginning of the 21 century astronomy is clearly a multidisciplinary activity touching on all aspects of science. It is therefore logical that in the past and still now, astronomy has attracted the most famous scientists, be they pure observers, mathematicians, physicists, biologists, experimentalists, and even politicians.
