THE WHOLE

Createspace, United States, 2013. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.The law is: the parts go down and climb up, but the whole never climbs nor descends. On the basis of this law will come a day when the cells of the head will go down to the legs and the cells of the feet will get into the head. This can happen after thousands of years - is not important. In nature there is absolute equality. Even the highest cell can take the lowest service. And conversely: the most inferior cell can take the highest post. In nature, every job is important. The stomach, which deals with lower works, the first tries the goods of life. A lot of time has to pass, while the brain tries something these goods. When talking about the parts of the whole, we run up two important laws. The first law is: part can never be greater than the whole, the whole can be always greater than any part and equal to the sum of all its parts. The second law is: any whole can be as small as the sum of its parts, but can never be less than them. The whole can never be less than its parts. Indivisible represents the smallest value in the world. Of the unit as an indivisible, there can be no smaller value. All the struggle of modern society lies in the fact that people want to come out of the whole. However, this is impossible. Each part has some impact. And when I say that in mind we are different from one another, I understand that the general intelligence that works in us, it is the same. But the mind of the whole...
