Reviews

*It is just one of the most popular ebooks. It usually fails to price an excessive amount of. You will not really feel monotony at any moment of your time (that's what catalogues are for about when you check with me).
(Matteo Torp)*

Condition: New. Publisher/Verlag: VDM Verlag Dr. Müller | Spatial Design and Behavioural Relations | **URBAN SEMIOTIC ANALYSIS** In many cities of the world, long established and highly revered social and spatial traditions have become subject to both internal and external pressures for change. This book analytical examined a range of different built environments (traditional houses to modern apartment buildings) in the city of Damascus, with a focus on understanding spatial behaviour and how it is changing. The study applied semiotic, as well as architectural and geographical theories to describe, compare, and evaluate sampled urban environments. The study examined components of the built environment, both as urbanscape characteristics and, as signs and information systems. The importance attached to deconstructing and understanding our perceptions of synthetic habits makes the book a good target for researchers in the field of social sciences as well as for urban designers (as space maker) and architects. It is also a valuable resource for readers seeking insight into the corporeal appearance of our authentic living world. | Format: Paperback | Language/Sprache: english | 541 gr | 220x150x20 mm | 396 pp.
