Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1875 Excerpt: .If r be the order of the system, we have then $r = 12$. Then the best value of n is 12×51 , or 612 . The fifths of this system have the departure Error = $000,058$ sharp. The thirds, being formed, according to the rule for complete symmetrical arrangements, by seven steps down instead of eight, have the departure $1 = -jL = -jJL$, . Error = $000,39$ flat. It is easy to see, from the correspondence of these errors, that they may be much diminished by making the fifths more perfect. The next higher value of r , which gives any considerable approximation applicable to complete symmetrical arrangements, is evidently 240 , since $240 \times 15 = 36$. Then $n = 240 \times 5115 = 12,276$. The departure of the fifth is $000,3$ in the seventh place of decimals; and error of the third = a unit in the fifth place. 61. Practical Use Of Positive Systems. An example of music written for positive systems is appended, as well as a short cyclic modulation in the system of 53 (pp. 151154). This last can be played on the harmonium, but not on the small enharmonic organ. The principal points in the harmony of these systems which have struck the writer occur in the example. It is to be specially noticed how certain forms of suspension have to...
