

Plane Trigonometry, Vol. 1: With the Use of Logarithms (Classic Reprint) (Paperback)

Filesize: 7.22 MB

Reviews

This is an remarkable publication that I have ever read. Indeed, it is actually engage in, nevertheless an interesting and amazing literature. I am just happy to inform you that this is the best publication i have got go through during my personal lifestyle and may be he finest ebook for actually.

(Toby Baumbach)

PLANE TRIGONOMETRY, VOL. 1: WITH THE USE OF LOGARITHMS (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, United States, 2015. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Plane Trigonometry, Vol. 1: With the Use of Logarithms 3. Here, however, we have unconsciously introduced the idea of a line having a positive or negative value. For a, we know, means $\int a$; and, if in our reasonings we should happen to arrive at some negative result as the value of a line, (if, for instance, it came out, at the end of a problem, that the value of a certain line was $-b$), What would this $(-)$ sign mean? We shall show that it indicates contrariety of direction to some line which we have before represented by a positive algebraical symbol. For let AB be a line, containing a units, which we may express algebraically by a or $+a$. Then, if from the end B we measure off in the direction BA a line BC containing b units, the length of the line AC will be $a - b$ units, and, therefore, its algebraical expression will be $a - b$. Now, if b be less than a , this expression for AC will be positive, and C will also lie to the right of A , that is, AC will be measured in the same direction as AB . But, if b be greater than a , then C will fall to the left of A as at Cy and AC will be measured in the contrary direction to AB , its value in units being $b - a$; while, at the same time, the expression $a - b$ will become negative, and may be written $-(b - a)$. We infer, then, that, when the algebraical expression for a line is negative, the $(-)$ sign indicates contrariety of direction to a line which...
