

anthropological atlas of female facial features

By Sabine Ohlrogge

Verlag F. Polizeiwissens. Mrz 2009, 2009. Taschenbuch. Condition: Neu. Neuware - The atlas of facial features of European females was compiled following the atlas name, which is already well-established in the forensic practice. It was composed within the scope of the EU-funded project Optimisation of Methods for Identification of Persons from Photographs (photoidentification): A Contribution to Combat and Prevention of Crime in Europe. Along with its predecessor this atlas should promote standardization in the procedure of photoidentification. For the manual photoidentification of a person, a suitable photograph of the suspect must be available. The next step of the analysis is the examination of the number and quality of recognizable facial features in the images from the surveillance camera (reference photographs). The suspects features are then compared with the reference photographs. For the final interpretation, the knowledge of the frequencies of individual facial characteristics in a respective population is of crucial importance. The presence of rare features allows for more significant statements of similarity. Photoidentification of females is rarely required compared to males. However cases involving females occur regularly in the forensic practise. Needless to say (Naturally, Obviously) features and variations of the male faces cannot be directly applied in such...

Reviews

This book might be worth a read, and superior to other. Of course, it really is engage in, still an interesting and amazing literature. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- Prof. Valentin Hane MD

Completely essential read through publication. It normally does not expense excessive. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- Morris Cruickshank
