

Clinical Hematology Atlas, 5e

By Bernadette F. Rodak Ms Mls

Saunders. No binding. Condition: New. 304 pages. Ensure you are accurately identifying cells at the microscope with Clinical Hematology Atlas, 5th Edition. An excellent companion to Rodak's Hematology: Clinical Principles and Applications, this award-winning atlas offers complete coverage of the basics of hematologic morphology, including examination of the peripheral blood smear, basic maturation of the blood cell lines, and information on a variety of clinical disorders. Nearly 500 photomicrographs, schematic diagrams, and electron micrographs vividly illustrate hematology from normal cell maturation to the development of various pathologies so you can be sure you're making accurate conclusions in the lab. Schematic diagrams, photomicrographs, and electron micrographs are found in every chapter to visually enhance understanding of hematologic cellular morphology. Smaller trim size, concise text, and spiral binding make it easy to reference the atlas in the laboratory. Chapter on normal newborn peripheral blood morphology covers the normal cells found in neonatal blood. Chapter on body fluids illustrates the other fluids found in the body besides blood, using images from cytocentrifuged specimens. The most common cytochemical stains, along with a summary chart for interpretation, are featured in the leukemia chapters to help classify both malignant and benign leukoproliferative disorders. Chapter featuring morphologic changes...
