

## Interocclusal Records : Materials and Techniques

Filesize: 4.09 MB

### **Reviews**

*This kind of pdf is every little thing and taught me to looking forward and more. It is one of the most incredible book i have read. You wont truly feel monotony at whenever you want of your time (that's what catalogs are for about should you check with me).  
(Miss Amelie Fritsch DVM)*

LAP Lambert Academic Publishing Okt 2014, 2014. Taschenbuch. Condition: Neu. This item is printed on demand - Print on Demand Neuware - Interocclusal record is an imprint of the positional relation of opposing teeth or jaws to each other, made of the surfaces of occlusal rims or teeth with a material such as plaster of paris, wax, zinc oxide-eugenol paste, or acrylic resin. It is a precise recording of a maxillomandibular position. To properly evaluate a patient s occlusion and to build up an artificial dynamic occlusal scheme, it is mandatory that the diagnostic casts are placed in an articulator in approximately the same relationship to the temporomandibular joint as it exists in the patient. The ideal material technique combination for making interocclusal records would allow the placement of indirectly fabricated prosthesis in the patients mouth with no occlusal adjustment and hence play a major role in the success of the rehabilitative procedures in terms of function and esthetics. The technique for making interocclusal record, chosen by the dentist should depend on clinical situation present and experience of the dentist and manufacturers instructions. 88 pp. Englisch.
