

Safety Differently: Human Factors for a New Era (Paperback)

Filesize: 7.34 MB

Reviews

The book is not difficult to read through better to recognize. It really is written in straightforward terms instead of confusing. I am happy to inform you that this is actually the finest publication I actually have read in my individual daily life and may be the best book for possibly.
(Valerie Heaney)

SAFETY DIFFERENTLY: HUMAN FACTORS FOR A NEW ERA (PAPERBACK)

Apple Academic Press Inc., Canada, 2014. Paperback. Condition: New. 2nd Revised edition. Language: English . Brand New Book. The second edition of a bestseller, *Safety Differently: Human Factors for a New Era* is a complete update of *Ten Questions About Human Error: A New View of Human Factors and System Safety*. Today, the unrelenting pace of technology change and growth of complexity calls for a different kind of safety thinking. Automation and new technologies have resulted in new roles, decisions, and vulnerabilities whilst practitioners are also faced with new levels of complexity, adaptation, and constraints. It is becoming increasingly apparent that conventional approaches to safety and human factors are not equipped to cope with these challenges and that a new era in safety is necessary. In addition to new material covering changes in the field during the past decade, the book takes a new approach to discussing safety. The previous edition looked critically at the answers human factors would typically provide and compared/contrasted them with current research and insights at that time. The edition explains how to turn safety from a bureaucratic accountability back into an ethical responsibility for those who do our dangerous work, and how to embrace the human factor not as a problem to control, but as a solution to harness. See What's in the New Edition: * New approach reflects changes in the field * Updated coverage of system safety and technology changes * Latest human factors/ergonomics research applicable to safety Organizations, companies, and industries are faced with new demands and pressures resulting from the dynamics and nature of the modern marketplace and from the development and introduction of new technologies. This new era calls for a different kind of safety thinking, a thinking that sees people as the source of diversity, insight, creativity, and...
