Reviews

*It in one of the best pdf. It is writter in straightforward words and never difficult to understand. Its been designed in an extremely straightforward way and it is just following i finished reading this book through which basically modified me, affect the way i believe.

Springer-Verlag New York Inc., United States, 2011. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. This book consists of contributions by participants in the Symposium Spectroscopic and Electrochemical Characterization of Solute Species in Non-Aqueous Solvents which took place at the American Chemical Society Meeting, Division of Analytical Chemistry, August 31 and September 1, 1976, San Francisco, California. The manuscripts were submitted to the editor during the first half of 1977 and, in most cases, represent reviews of selected research topics in the broad area of characterization of solute species in non-aqueous solvents. In organizing this Symposium, I attempted to bring together a significantly large group of research workers involved in spectroscopic and electrochemical studies in the three large classes of non-aqueous solvents ~ organic solvents, covalent inorganic solvents and molten salts. The experimental approaches and problems, such as avoidance of traces of moisture and oxygen, are frequently similar for all types of non-aqueous solvents. It is hoped that this volume will be useful to all concerned with chemistry in non-aqueous solvents. Gleb Blamantov , Contents 1.
