Excerpt from Periodic Conjugate Nets: A Dissertation Presented to the Faculty of Princeton University in Candidacy for the Degree of Doctor of Philosophy In section 2, we impose upon the sequence  $N_r$  the condition that it shall be periodic; that is, that a certain Laplace transform  $N_p$  of  $N$  shall coincide with  $N$  itself. After transformation of parameters it is shown that the identity of  $N_p$  and  $N$  involves the identity of  $N_{p-1}$  and  $N_1$  and in general, of  $N_{p-k}$  and  $N_{k-1}$ ,  $2, 0, p$ . Necessary conditions on the coefficients of the point equation of  $N$  are derived and it is shown by discussion of the completely integrable systems of partial differential equations involved that these conditions are also sufficient. It is also shown that if an equation of Laplace of form (1) is the point equation of one periodic net, it is the point equation of an infinity of others of the same period.
