Dartmouth College Press / University Press of New England, Hanover, 2007. Softcover. Book Condition: New. 347 pages. Softcover. New book. ETHICS. An anthology of succinct and accessible articles on the most important ethical issues confronting health care and the biological sciences today. Today's complex set of moral issues involving medical research, health care, and the biological sciences can best be understood through the diverse perspectives of healthcare-providers, scientists, and others who have a vital stake in the field. Culled from the pages of the groundbreaking journal, Lahey Clinic Medical Ethics, this book offers students, healthcare professionals, and the general public insights into key ethical concepts and their practical applications through the writings of physicians, philosophers, theologians, nurses, humanists, anthropologists, psychologists, historians, policy experts, lawyers, and others. The volume includes discussions of bioethical challenges in the clinical arena; ethical challenges associated with advances in biotechnology, genetics, and reproductive medicine; legal perspectives; physician-assisted suicide and euthanasia; health policy and distributive justice; the experience of illness, and many more critical issues. Commentary on such issues from a broad range of perspectives Ñ including debates among proponents of clashing viewpoints Ñ adds to the book's richness, texture, and depth.
