Date :2007-2-1. Bone and joint injuries and people are working and living closely related to common disease. After several years of rigorous training of young physicians. its diagnosis and treatment. most of them can basically grasp. However. the rapid development of related technology. in damage to the reality of an increasingly complex and serious cases. how can it have a more in-depth understanding of greater ease in handling There are three issues deserve attention: to be good dialectical identification and treatment of each specific injury. the diagnosis is to see its formation. existence and development of the whole process. the treatment to learn different methods of Yang of its length. to avoid the short. is not bound by routine. Necessary to use the principles to guide the orthopedic bone and joint injury treatment. Understanding of the basic conditions of human movement and manner. as a basis for judgments and treatment. Does not limit itself to the technical operations in a separate. To be good at home and abroad to learn the strengths and experience of each. the theory of reasoned argument as a reference; indeed an effective way to take for its own purposes. Ideas from various schools in the active receive inspiration. things that have been familiar with continuous improvement. continuous development. in order to form their own characteristics. The preparation of this monograph started from the first edition. which as far as possible reflect the above three requirements. Subsequent version is based on professional development. to enrich. But not only list all kinds of theories and technologies related to technology. but some analysts. structured guidance. the reader starts to...
