Reviews

Here is the finest publication we have read right up until now. It is actually written in easy words instead of difficult to understand. It has been written in a remarkably easy way in fact it is only right after I finished reading this book in which it basically changed me, modified the way I really believe.

(Prof. Vanessa Smitham V)

EINSTEINS CLOCKS, POINCARES MAPS: EMPIRES OF TIME

W. W. Norton & Company. Paperback. Book Condition: New. Paperback. 400 pages. Dimensions: 8.3in. x 5.5in. x 1.2in. More than a history of science; it is a tour de force in the genre. New York Times Book Review A dramatic new account of the parallel quests to harness time that culminated in the revolutionary science of relativity, *Einsteins Clocks, Poincars Maps* is part history, part science, part adventure, part biography, part meditation on the meaning of modernity. . . . In Galisons telling of science, the meters and wires and epoxy and solder come alive as characters, along with physicists, engineers, technicians and others. . . . Galison has unearthed fascinating material (New York Times). Clocks and trains, telegraphs and colonial conquest: the challenges of the late nineteenth century were an indispensable real-world background to the enormous theoretical breakthrough of relativity. And two giants at the foundations of modern science were converging, step-by-step, on the answer: Albert Einstein, a young, obscure German physicist experimenting with measuring time using telegraph networks and with the coordination of clocks at train stations; and the renowned mathematician Henri Poincar, president of the French Bureau of Longitude, mapping time coordinates across continents. Each found that to understand the newly global world, he had to determine whether there existed a pure time in which simultaneity was absolute or whether time was relative. Esteemed historian of science Peter Galison has culled new information from rarely seen photographs, forgotten patents, and unexplored archives to tell the fascinating story of two scientists whose concrete, professional preoccupations engaged them in a silent race toward a theory that would conquer the empire of time. 40 bw illustrations This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.
