

Automated Juice Mixer

By Bakr, Mohamed / Hamouda, Karim

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | This is a report about design and manufacturing process of an automated juice mixer. The purpose of this machine is to provide a more hygienic alternative to conventional juice bar, while saving the excessive amount of water used in cleaning the cups in juice bars. The machine consists of the following subsystems: storage system, mixing system, pumping system, rinsing system, control system and electronics. A prototype was manufactured, which did not include all the features of the final product, but contained all the main systems mentioned. | Format: Paperback | Language/Sprache: english | 64 pp.

Reviews

I just started looking over this ebook. It is actually rally fascinating through reading period of time. You wont really feel monotony at anytime of your time (that's what catalogues are for about when you request me).
