Proceedings of the American Association for the Advancement of Science Volume 20

By American Association for Science

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 168 pages. Dimensions: 9.7in. x 7.4in. x 0.4in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1872 Excerpt: . . . while other portions not under those lines were sinking, as Greenland, north of latitude 69 north, which is north of the terminator. All these and many other coincidences forced the conviction that the sun, at least at the solstitial periods, must by thermal difference generate currents of electricity, probably in the oxygen of the air, and in the diamagnetic earth molecules. This would at once account, as Ampere showed, for the magnetic needle arranging itself at right angles to those currents; and if magnetism can expand the earth's crust, then we see why the land was elevated along the secondaries. But if it be denied that magnetic impulses are sufficient to produce these phenomena, then A. A. s. Vol. xx. 27 we have only to consider magnetism converted into its other phase, chemical action, with the development of gases, the fusion from solidity, or the...
