Classical Electromagnetic Radiation

By Mark A. Heald

Dover Publications Inc. Paperback. Book Condition: New. Paperback. 592 pages. Dimensions: 9.1in. x 6.1in. x 1.3in. This newly corrected, highly acclaimed text offers intermediate-level juniors and first-year graduate students of physics a rigorous treatment of classical electromagnetics. The authors present a very accessible macroscopic view of classical electromagnetics that emphasizes integrating electromagnetic theory with physical optics. The survey follows the historical development of physics, culminating in the use of four-vector relativity to fully integrate electricity with magnetism. Starting with a brief review of static electricity and magnetism, the treatment advances to examinations of multipole fields, the equations of Laplace and Poisson, dynamic electromagnetism, electromagnetic waves, reflection and refraction, and waveguides. Subsequent chapters explore retarded potentials and fields and radiation by charged particles; antennas; classical electron theory; interference and coherence; scalar diffraction theory and the Fraunhofer limit; Fresnel diffraction and the transition to geometrical optics; and relativistic electrodynamics. A basic knowledge of vector calculus and Fourier analysis is assumed, and several helpful appendices supplement the text. An extensive Solutions Manual is also available. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.

Reviews

I just started looking over this ebook. I could possibly comprehend everything out of this published publication. You are going to like the way the author compose this publication.

-- **Giles Vandervort DDS**

The very best book I actually read through. I have got read through and I am certain that I will likely to read through yet again yet again down the road. I realized this ebook from my dad and I suggested this book to learn.
