Forgotten Books. Paperback. Condition: New. This item is printed on demand. 580 pages. Dimensions: 9.0in. x 6.0in. x 1.2in. Excerpt from Laboratory Work in Bacteriology A thorough course of laboratory instruction in bacteriology is absolutely essential to the proper education of the medical student of the present day. The practical knowledge thus acquired in the methods of handling bacteria, in the precautions necessary to the prevention of personal infection, and in the methods for the recognition and for the destruction of disease-producing organisms is fundamental and invaluable. Such information is directly useful as a means of diagnosis; it is necessary to the successful performance of antiseptic operations and is indispensable to the proper execution and understanding of the common hygienic measures for the prevention of communicable diseases. It is therefore evident that the course in bacteriology should not be inferior, either in length or in the character of the instruction, to any other laboratory course offered in the medical curriculum. The student should be taught to work, not merely with a few harmless bacteria, but especially with all of the common pathogenic organisms. The exclusion of the latter organisms from a laboratory course on the plea of danger is an admission of weakness in instruction or in supervision. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
