The authors integrate coverage of modern molecular techniques and recent research advances without losing students in overwhelming detail. The World of the Cell's trademark features -- Art that Teaches, Multi-level Problem Sets, Quick Check Concept Statements, Guide to Techniques and Methods, and Boxed Essays (Further Insights, Experimental Techniques, and Human Applications) -- help students learn the process of science, not just facts. As cell biology continues to incorporate molecular biology advances, instructors can count on Becker's text to provide strong coverage of basic biochemistry in an easy-to-follow framework, while also offering a balanced coverage of cellular metabolism. 944 pp. Englisch.
