I N T R O D U C T I O N Systematic and comprehensive testing is known to be a major factor contributing to Information Systems Quality. Adequate testing is however often not performed, leading to a higher number of software defects which impact the real and perceived quality of the software, as well as leading to time and expense being spent on rework and higher maintenance costs. How to Write Software Test Documentation is a plain-English, procedural guide to developing high quality software test documentation that is both systematic and comprehensive. It contains detailed instructions and templates on the following test documentation: Test Plan, Test Design Specification, Test Case, Test Procedure, Test Item Transmittal Report, Test Record, Test Log, Test Incident Report, Test Summary Report, How to Write Software Test Documentation is derived principally from IEEE Std 829 Standard for Software Test Documentation. It contains clear instructions to enable project staff with average literacy skills to effectively develop a comprehensive set of software test documentation. D E T A I L Test Plan: a document describing the scope, approach, resources and schedule of testing activities. Test Design Specification: a document that provides details of the test approach in terms of the features to be covered, the test cases and procedures to be used and the pass/fail criteria that will apply to each test. The test design specification forms the entry criteria for the development of Test Procedures and the specification of Test Cases on which they operate. Test Case: a document specifying actual input values and expected outputs. Test cases are created as separate documents to allow their reference by more than one test design specification...
