Excerpt: . . . Chapter 1-History and Physical Description this storage area. Parts that are determined to be in complete working order and that are still cosmetically acceptable are returned to inventory and sent to other customers. The other parts are disposed of or held in the storage area until they are picked up and removed by the NIST surplus property department. 1. Configuration of Remote FMS Units One goal of the FMAS is to provide an identical FMS unit to each customer. This is desirable for two reasons. First, it is imperative that data are collected in the same way at all sites so that the assigned measurement uncertainties at each site are equivalent. Second, it is easier for NIST to stock replacement parts if all units use identical parts. Unfortunately, some commercially available parts of the FMS (particularly the computer parts) have very short product life cycles. For example, it is usually impossible...

Definitely one of the better book We have possibly read. We have read through and i also am certain that i am going to gonna study once again yet again in the foreseeable future. Once you begin to read the book, it is extremely difficult to leave it before concluding.
