Analysis of Powertrain
Acoustic Properties

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | The issue of computational modelling of noise and vibration of powertrain is the next logical step in the virtualization of the design process. Engine manufactures and also all producers not only in the automotive industry are trying to change the process of development in to the virtual design as much as possible. This is due to reducing design costs and shortening the time needed to put the product to customers. Technical requirements...
