

INFORMATION SYSTEMS IN DEVELOPING COUNTRIES (Paperback)

By -

City University of Hong Kong Press, Hong Kong, 2005. Paperback. Condition: New. Language: N/A. Brand New Book. The digital divide and the inequalities of the availability and deployment of Information and Communication Technologies (ICTs) between developed and developing countries have long been a source of concern. Global institutions such as the United Nations, the International Telecommunications Union (ITU) and the World Bank, as well as regional and national level agencies, have set up task forces to investigate how ICTs can be enacted most effectively in developing countries. In this volume, we go beyond the theoretical, the polemical and the philosophical to consider practical issues as they are encountered by stakeholders in the developing country context. 15 author teams explore key issues organized into four sections: Theoretical Background and Culture; Telecentres; Applications; and, Key Concepts with Country Specific Studies. Examples of these applications are also described in chapters about Azerbaijan, Brazil, China, Fiji, India and Thailand.
