Utah State University Press, United States, 2014. Paperback. Condition: New. Language: English . Brand New Book. Trevor Blank broke new ground for the field of folklore studies in this essay by rationalizing the study of the Internet as an important area of expressive vernacular culture. He argues that from the earliest moments of the modern Internet's existence, folklore was a central component of the domain, moderating the intersection of computer professionals with hackers, newfangled lingo, and the dispersal of stories, pranks, and legends. With this treatise and the volume it introduces, *Folklore and the Internet*, Blank theorizes the Internet as an important analytic venue for folklorists and sets the agenda for digital folklore research.
