

## Bioprocess and Nanobiotechnological Strategies for Medical Services

By Shahira H. EL-Moslamy

LAP Lambert Academic Publishing Mai 2017, 2017. Taschenbuch. Condition: Neu. Neuware - Nano-Biotechnology is a new fringe for biology that allows scientists to work at the cellular molecular and large scale production levels to produce major benefits to life sciences and healthcare applications by using new industrial biotechnology-based on novel approaches in medicine. This book provides perspective for students and researchers who are interested in industrial nanobiotechnological and biological systems and their applications in medicine. The biotechnological impact of nanoscale systems and eco-friendly, quicker, cheaper of biosynthesis of Cu/CuO nanoparticles from citrus peel waste extracts as bio-manufacturing units will be discussed. 52 pp. Englisch.

### Reviews

*It is a of my personal favorite book. It is written in easy terms and never hard to understand. It has been designed in an exceedingly easy way and it is only after I finished reading this publication by which in fact changed me, change the way I think.*

-- **Lucinda Stiedemann**

*Very good eBook and valuable one. Better than never, though I am quite late in starting reading this one. I am very easily could possibly get a satisfaction of reading through a created publication.*

-- **Brianne Heidenreich**
