Excerpt: . be the most attractive to, and the most considered by, mechanics and engineers. The only test of beauty and elegance of design in an engine is fitness and perfect proportion to the stresses placed upon the various parts. The severest simplicity of design should be adhered to. Every pound of metal, where it does not subserve some useful purpose, every attempt at mere ornament, is a defect, and should be avoided. The well-educated engineer should combine the qualities of the practical man and the physicist; and the more he blends these together, making each mould and soften what the other would seem to dictate if allowed to act alone, the more will his works be successful and attain the exact object for which they are designed. The steam-boiler and its construction will be found to be very thoroughly treated in Professor Trowbridge s...
