Cambridge University Press. Hardcover. Book Condition: New. Hardcover. 290 pages. Dimensions: 9.1in. x 6.1in. x 1.0in. As probability and combinatorics have penetrated the fabric of mathematical activity, sieve methods have become more versatile and sophisticated and in recent years have played a part in some of the most spectacular mathematical discoveries. Nearly a hundred years have passed since Viggo Brun invented his famous sieve, and the use of sieve methods is constantly evolving. Many arithmetical investigations encounter a combinatorial problem that requires a sieving argument, and this tract offers a modern and reliable guide in such situations. The theory of higher dimensional sieves is thoroughly explored, and examples are provided throughout. A Mathematica software package for sieve-theoretical calculations is provided on the authors website. To further benefit readers, the Appendix describes methods for computing sieve functions. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Hardcover.
