Reviews

This pdf is definitely not easy to get started on studying but quite entertaining to read through. I am quite late in start reading this one, but better then never. Once you begin to read the book, it is extremely difficult to leave it before concluding.

McGill-Queen's University Press, Canada, 2017. Hardback. Condition: New. Language: English . Brand New Book. National historic sites commemorate decisive moments in the making of Canada. But seen through an environmental lens, these sites become artifacts of a bigger story: the occupation and transformation of nature into nation. In an age of pressing discussions about environmental sustainability, there is a growing need to know more about the history of our relationship with the natural world and what lessons these places of public history, regional identity, and national narrative can teach us. *Nature, Place, and Story* provides new interpretations for five of Canada's largest and most iconic historic sites (two of which are UNESCO World Heritage Sites): L'Anse aux Meadows, Newfoundland; Grand Pre, Nova Scotia; Fort William, Ontario; the Forks of the Red River, Manitoba; and the Bar U Ranch, Alberta. At each location, Claire Campbell rewrites public history as environmental history, revealing the country's debt to the power and fragility of the natural world, and the relevance of the past to understanding climate change, agricultural sustainability, wilderness protection, urban reclamation, and fossil fuel extraction. From the medieval Atlantic to modern ranchlands, environmental history speaks directly to contemporary questions about the health of Canada's habitat. Bringing together public and environmental history in an entirely new way, *Nature, Place, and Story* is a lively and ambitious call for a fresh perspective on natural heritage.
