Academic Press, 2012. Taschenbuch. Condition: Neu. Neu Neuware, Importqualität, auf Lager, Versand per Büchersendung - People experiencing disorders in regulation are highly sensitive to stimulation from the environment, emotionally reactive, and have difficulty maintaining an organized and calm life style. They are impulsive, easily frustrated, and as a result make decisions that lead to an overwrought state-or who conversely retreat entirely from the world. This disorder is most likely to accompany diagnoses of bipolar or mood disorder, anxiety, depression, obsessive-compulsive disorder, Asperger's syndrome, eating or sleep disorders, and/or attention deficit disorder. This book instructs therapists how best to treat the dysregulated adult, providing diagnostic checklists, and a chapter by chapter inventory in approaching treatment of dysregulation in a variety of life skills. Informs the therapist how dysregulation relates to multiple disorders Includes clinical observations and case studies Gives therapist tools and techniques for the client to understand his behavior, reframe problems in a positive way, and take responsibility for behavior change Encompasses sensory integration therapy and mind-body techniques for the therapist to guide client toward self-calming Emphasis on effective relational dynamics between the client and significant people in his/her life Separate chapters on how to treat dysregulation effects on multiple behaviors including mood regulation, behavioral control, inattention, sleep, feeding, and social interactions 504 pp. Englisch.
