Lulu.com, United Kingdom, 2017. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.I have controlled three skin cancers for five years so that they are just harmless patches of skin, and believe this can be done for all cancers. The author has identified misunderstandings by scientists in gene mutation, cell division and the essential role of the sun in all cell growth. The author explains, why each strand of DNA matches a unique wavelength of the sun. The role of the eye, neurons and nerves in passing energy to cells for growth. Why gene mutation is not a copying error but a routine natural process for survival. How plants adjust genes retrospectively in the autumn to survive better in the local climate. Why cancer tumours may be shrunk by dispersing the energy in a nerve with a needle. The author suggests the processes that enabled evolution from simple pond life to a highly intelligent man and concludes that man s design was achieved by his own effort. He designed himself!.
