RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 36 pages. Original publisher: Washington, DC: Western Energy and Land Use Team, Division of Biological Services, Research and Development, Fish and Wildlife Service, U. S. Dept. of the Interior, 1984 OCLC Number: (OCoLC)297374022 Subject: Habitat partitioning (Ecology) -- Mathematical models. Excerpt: . . . in home range use in response to vegetation changes and weather are common. Anderson and Pelton (1976) reported that eastern cottontails that did shift their home ranges were not observed to return to their original home range. Temporary home range departures were recorded after the onset of the breeding season. Unless a sudden reduction of cover occurred, cottontail s remained within their home range. Harvesting of crops did result in evacuation of home ranges. Swi hart and Yahner (1982b) a so recorded abandonment of home ranges 1 as a result of crop harvest. Emigration from home ranges within croplands resulted in autumn and winter concentrations of eastern cottontails within nearby wooded habitats. Local populations of eastern cottontails may reach a density of 20 (8 acre) rabbitslha although densities are normally lower (Chapman et al. 1982). The...
