

Theory of Heat

By James Clerk Maxwell

TheClassics.us. Paperback. Book Condition: New. This item is printed on demand. Paperback. 94 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1872 edition. Excerpt: . . . agency, to convey heat from one body to another at a higher temperature. Thomson gives it a slightly different form: --It is impossible, by means of inanimate material agency, to derive mechanical effect from any portion of matter by cooling it below the temperature of the coldest of the surrounding objects. By comparing together these statements, the student will be able to make himself master of the fact which they embody, an acquisition which will be of much greater importance to him than any form of words on which a demonstration may be more or less compactly constructed. Suppose that a body contains energy in the form of heat, what are the conditions under which this. energy or any part of it may be removed from the body If heat in a body consists in a motion of its parts, and if we were...
