## THE ART OF MODELING STARS IN THE 21ST CENTURY IAU S252 PROCEEDINGS OF THE INTERNATIONAL ASTRONOMICAL UNION SYMPOSIA AND COLLOQUIA

DOWNLOAD

Cambridge University Press. Hardcover. Condition: New. 500 pages. Dimensions: 9.8in. x 6.8in. x 1.2in. Stellar models are the very basic building blocks with which we build up our knowledge of the Universe. New numerical experiments are heralding a new level of sophistication in our ability to model, and understand, how stars work. This volume provides an overview and the most recent advances in modeling of stellar structure and evolution. Modeling of stars relies on our understanding of the detailed physical processes happening in stars, and the most recent observations of stars made by modern large telescopes and current high technologies. IAU Symposium 252 presents the most recent developments in five key areas, including: improvements of the physical ingredients of stellar models; the evolution of low and intermediate mass stars; the evolution of massive stars; close binary evolution; and stellar physics in the era of very large telescopes. This overview of stellar research is at a level suitable for research astronomers and graduate students. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Hardcover.
