This instruction provides guidance to Occupational Safety and Health Administration (OSHA) national, regional and area offices, and State Plan programs and federal agencies concerning OSHA's policy and procedures for implementing inspection programs to reduce injuries, illnesses and fatalities, and eliminate workplace hazards in shipyard employment through the use of personal protective equipment (PPE). OSHA revised the shipyard employment safety standards addressing PPE in 1996 (61 F. R. 26321). The revised standards updated, reorganized and simplified shipyard employment PPE standards into a comprehensive framework that encompasses the ship repair, shipbuilding and shipbreaking industries. On September 9, 2009, OSHA issued a final rule, Updating OSHA Standards Based on National Consensus Standards; Personal Protective Equipment (74 F. R. 46350-46351), that applies to all industries. Provides OSHA compliance officers with information about PPE selection and use in shipyard employment and in minimizing employee exposure to hazards. Supports the National Emphasis Program (NEP) on Shipbreaking, and the Site-Specific Targeting (SST) Program for the shipbuilding and ship repairing industries. This instruction has been revised and updated to include the following significant changes...
