Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Characterization of cadmium resistant bacterial isolates and diversity studies | Cadmium is a non-essential heavy metal. It is well known for its toxicity, bioaccumulation and biomagnifications. It has wide range of sources from the environment and from industry. Microbes have been utilized as a bioremediation vehicle with use of genetic engineering approaches. A diverse group of microbes play an important role in this direction. Here, in this book it has been described...
