Excerpt from Lessons in Geography and Astronomy on the Globes: Supplementary to the Textbooks Generally Used on These Subjects Pupils, whose minds have been well disciplined by the study of the pure mathematics, may possibly dispense with the use of the globes in the study of Geography and Astronomy. But for the great majority of pupils in our common schools and academies, whose minds are not, and are not expected to be, thus thoroughly prepared and furnished, the use of the globes seems to be indispensable. And even for students in our colleges, Professor Olmsted says, The study of artificial globes cannot be too strongly recommended to the student of astronomy. Such being the case, it is surprising that these good old-fashioned implements of learning are not more generally introduced into our schools than they are, and, where they are introduced, that their usefulness is not more highly appreciated or made available. One cause of this unmerited neglect of the globes is thought to be the want of a concise and suitable text-book to be used by the pupil along with the globes. The old treatises on the globes are too large and expensive and encumbered with extraneous matter for the present necessity and especially are they objectionable for the empirical and dogmatical form in which they present the truths and problems which they teach. All science, properly so called, is but the development of certain fundamental ideas or principles; and no science is properly taught or understood except by a development of its first principles, - its details must be seen by the light of its fundamental ideas. This is true of Geography...
