What causes dyslexia, and how does it manifest across languages? As bilingualism becomes increasingly important globally, these questions have never been more critical-and this comprehensive volume from The Dyslexia Foundation explores them in unprecedented depth. Bringing together the best brain-based, genetics, and behavioral research in the field from more than 40 of today s most highly respected researchers, this landmark volume fully examines what we know about the identification, manifestations, and potential differences in dyslexia across languages and orthographies. International contributors share their groundbreaking studies, helping researchers and graduate-level students investigate key questions about dyslexia: \* How does dyslexia vary in frequency and manifestation among speakers of various alphabetic and nonalphabetic languages? \* How might the characteristics of different languages affect reading acquisition and reading difficulties? \* How do genetic profiles interact with environment to influence how reading difficulties manifest? \* Are there unique neurobiological and/or behavioral characteristics that are universal to dyslexia? \* How can computational and statistical modeling contribute to a better understanding...
