Createspace Independent Publishing Platform, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. LCS represents an innovative approach to Navy acquisitions and operations, consisting of a ship-called a seaframe-and reconfigurable mission packages. These packages provide combat capability to perform three primary missions: surface warfare; mine countermeasures; and anti-submarine warfare. The Navy plans to buy no more than 32 seaframes in two variants from two shipyards, and 64 mission packages, with an estimated acquisition cost of over \$25 billion in 2010 dollars. GAO was mandated to examine elements related to the LCS program. This report examines (1) knowledge that the Navy has gained since GAO issued a report on the LCS program in July 2013 and (2) outstanding acquisition risks with the LCS program. GAO analyzed key documents, including test and weight reports, and interviewed Navy officials responsible for the LCS deployment and program officials. This report is a public version of a sensitive but unclassified report issued in April 2014.
