

## Teaching ethics in primary science

By Ryan, Barbara Elizabeth

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Planning support for teachers | This book focuses on teaching ethics in primary science classrooms. Such teaching is important because it engages students not only in the human aspects of science, but also in science more generally, leading to enhanced scientific literacy and ultimately contributing to responsible citizenship. Teaching ethics in science also presents opportunities for developing students argumentation, critical thinking and decision-making skills, and helps students become more ethically aware, knowledgeable and discerning in science. Ethics in science has a prominent role in the New Zealand Curriculum within the nature of science strand in the science learning area. However, there is a paucity of research demonstrating how this might be implemented with primary-age students. This work determines firstly whether primary students can engage in ethical discussions in science. Secondly, it focuses on the question of support needed for primary teachers and whether it is helpful for teachers to use a subject-specific planner for teaching ethics in science. | Format: Paperback | Language/Sprache: english | 432 pp.

### Reviews

*It is one of the best publications. It is definitely simplistic but exciting in the 50% of the ebook. I am very happy to let you know that this is basically the greatest publication I have ever gone through within my own existence and could be the greatest pdf for ever.*

-- **Dr. Anya McKenzie**

*It is one of the most popular publications. It is actually really intriguing through looking at time period. Your daily life span is going to be changed the instant you total reading this publication.*

-- **Mrs. Shanna Mann**
