Louis Pasteur

By Rene Dubos

Da Capo Press. Paperback. Book Condition: New. Paperback. 462 pages. Dimensions: 8.3in. x 5.5in. x 1.2in. In the words of one of his English contemporaries, Louis Pasteur was the most perfect man who ever entered the kingdom of science. His contributions to the development of microbiology and medicine were profound, both practically (Pasteurization and vaccination) and theoretically (the germ model of disease). He spoke out forcefully on issues of the day, especially when they concerned public health, and his research included studies on rabies, anaerobic life, childbirth fever, silkworms, and beer. René Dubos's outstanding biography examines Pasteur's manifold genius in the context of the era. Pasteur was an exemplary nineteenth-century bourgeois and in light of recent environmental thought. His view of Pasteur as ecologist, the first to formulate in concrete terms a biological and chemical theory of global ecosystems, is only one of the many surprising insights into a man whose emblematic fame has obscured a complex and rich life. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.

Reviews

This publication is wonderful. It was actually written very completely and beneficial. You may like the way the writer composed this publication.
-- Prof. Aisha Mosciski PhD

Basically no phrases to clarify. It really is written in straightforward phrases rather than hard to understand. You will not sense monotony at any moment of your own time (that's what catalogues are for concerning if you ask me).
