Excerpt from The North Pole, the Great Ice Age, and the Deluge: With an Appendix on the Differing Magnetic Phenomena of the South But all those mountains put together, which the giants upheaved, were a mere tri?e to this; and the Enipeus was but as a dewdrop to the Mississippi. And all this merely to account for how the intense cold was to be got, sufficient to freeze up the world; all called out in that new internecine combat of giant glacial theorists, whose whole speculation is only a conjectural substitute for the universal deluge of scripture and of Christian faith, and of the still lingering vestiges of its memory among all nations. No doubt the Almighty power of God was sufficient for Dr. Hull, but we have no right to presume upon it to back up philosophical speculations. If it be thought that the ocean soundings prove the existence of a former coast line on the east of America relatively higher than the present, the explanation must be sought only by reasonable deduction from known facts of nature, and in accordance with its laws. The Most High hath ordered all things by measure and number and weight. He hath weighed the mountains in scales, and the hills in a balance. And this not only in regard to the heaviest things.
