

Linear Analysis on singular spaces

By Francesco Bei

Edizioni Accademiche Italiane. Taschenbuch. Book Condition: Neu. 220x150x mm. Neuware - During the last 30 years stratified pseudomanifolds turned out to be a very reach field of interactions between analysis and topology. The aim of this book is to explore some of these interactions. More precisely the book is divided in two parts. The first half is dedicated to the relationships between the L^2 de Rham cohomology, Hodge cohomology (both associated to a suitable incomplete riemannian metric) and the intersection cohomology of a stratified pseudomanifold. In particular the question of the Poincaré duality for the L^2 cohomology associated to an incomplete metric is discussed. The second half concerns the generalization of the well known theorem of Atiyah-Bott for elliptic complexes over a closed manifolds to the case of elliptic complexes of cone differential operators over a manifold with conical singularities. 108 pp. Englisch.

Reviews

Thorough manual! Its this kind of excellent study. It really is written in straightforward terms and never difficult to understand. I am very happy to inform you that this is basically the very best pdf we have read through during my individual existence and could be the greatest ebook for possibly.

-- Dr. Arno Sauer Sr.

A must buy book if you need to adding benefit. It can be really intriguing through reading time period. I am easily could get a pleasure of looking at a composed book.

-- Dr. Julius Goodwin DDS
