Forgotten Books, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Textile Machinery: With Special Reference to Spinning Frames Built by Saco-Lowell Shops Frame is of unusually heavy construction. Supports are fitted with adjusting screws and check-nuts to permit leveling of frames on uneven floors. Supports have milled, reinforced pockets for supporting the channel roller beam. The whole frame is also stiffened by the box type of spindle rail. To insure these parts being held permanently in their correct positions, the roller beam and box rails are not only bolted but dowel pinned to the supports and frame ends. This construction gives a very rigid skeleton, and also gives assurance of the frame keeping its alignment. Head end (geared End) is arranged with quiet running gearing, made easily accessible by our new type swinging steel doors. The safety lock makes it impossible for the operative to open the doors while the frame is in motion or to start the frame with the doors open. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
