Reviews

This sort of book is everything and taught me to seeking forward and more. This really is for those who statte there had not been a well worth reading. I found out this pdf from my i and dad advised this book to discover.

(Prof. Griffin Murphy)

BYE-BYE BIG BANG

BOOKS ON DEMAND, United States, 2014. Paperback. Book Condition: New. 210 x 148 mm. Language: English . Brand New Book ***** Print on Demand *****.Sammanfattning av boken Stora Smallen-teorin är den rådande teorin om universums ursprung och dess utveckling. Den har utvecklats under hela forna seklet. Dess huvudargument är den så kallade galaxernas flykt. Spektralanalysen av ljuset från galaxer visar att absorptionslinjerna är förskjutna till den röda delen av spektrumet. Utifrån dopplereffekten tolkar man detta som att alla galaxer avlägsnar sig från observatören. Man menar att för i tiden var galaxer närmare varandra. Om man går ännu längre bakåt i tiden innebär detta att hela universum var komprimerat i en punkt som exploderade. Där har vi stora Smallen. Forfattarens visar genom analys av befintliga data och mätningar att dessa inte stämmer med Stora Smallens slutsatser. Forfattarbiografi Jan Slowak är född i Transsylvanien, Rumänien. Han har studerat matematik och data vid universitet Babes-Bolyai i Cluj-Napoca, huvudort i Transsylvanien. Jan är bosatt sedan 1988 i Sverige. Summary of the book Big Bang theory is the prevailing theory about the origin of the universe and its evolution. It has evolved throughout the last century. Its main argument is the so-called galactic escape. The spectral analysis of light from galaxies shows that the absorption is shifted to the red part of the spectrum. Based on the Doppler effect man interpret this to mean that all galaxies recede from the observer. It is said that for a time was the galaxies closer together. If one goes further back in time, this means that the entire universe was compressed into a point that exploded. There we have the Big Bang. The author shows through analysis of existing data and measurements that these do not match with Big Bang conclusions.
