Brand New Book ***** Print on Demand *****.Excerpt from Nashville Journal of Medicine and Surgery, Vol. 109 Listerine embodies a two-fold antiseptic effect, in that after the evaporation of its volatile constituents - thyme, eucalyptus, mentha, gaultheria and ethyl alcohol - a film boracic and benzoic acids remain upon the surface to which Listerine has been applied, affording more prolonged antiseptic protection. Listerine is a trustworthy surgical dressing; it has no injurious effect upon the tissues in which the healing process is going on. Listerine in proper dilution is useful in the treatment of abnormal conditions of the mucosa and forms a suitable wash, gargle or douche in catarrhal conditions of the nose and throat. Listerine in teaspoonful doses will often afford relief in fermentative dyspepsia and is largely prescribed, with excellent results, in the various forms of diarrhoea occurring in infants and adults. Reviews

Thorough manual for pdf lovers. I am quite late in start reading this one, but better then never. It is extremely difficult to leave it before concluding, once you begin to read the book.
